Introducing  
THE MEDICI COLLECTION  
*from Burlington*

In 1929, the Standard Sanitary Corporation of America introduced a luxury bathroom colour, Ivoire De Medici, said to “have brought the warmth of sunlight to bathroom décor”. This ‘mellow tint of old ivory’ was first achieved by Italian potters who worked under the patronage of the famous de Medici family in Florence. The famous writer and style leader of the time Emily Post wrote “I would very much like to rip out all the white ones and burst into colour”.

Now, 90 years later, Burlington Bathrooms have lovingly crafted a number of their popular classical designs into a capsule collection of time-honoured pieces featuring this unique subtle, natural coloured ceramic, reminiscent of bygone eras of great bathroom design.

*Accessories*

Arched mirror and Ornate  
lights with vase shades.

*Bath*

Medici Batello grande  
bath, Medici Claremont  
bath shower mixer and  
stand pipes.

*Brassware*

Medici Claremont basin mixer with high central indice and click-clack waste.

White: L1W

Black: L1B

## BRASSWARE

Burlington brassware can be customised with a choice of 4 tap heads; Claremont, Birkenhead, Anglesey and Kensington. In addition, Burlington is the first British traditionally designed range that enables water savings despite varying water pressures. We supply every tap with two Neoperl devices: a flow straightener, which is for use with low water pressures and an aerator, which is for use with high water pressures.

*Claremont*

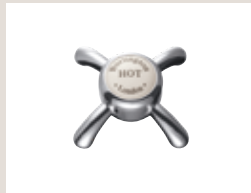

Add code CL

*Birkenhead*

Add code BI

*Anglesey*

Add code AN

*Kensington*

Add code KE

*Normal spout*

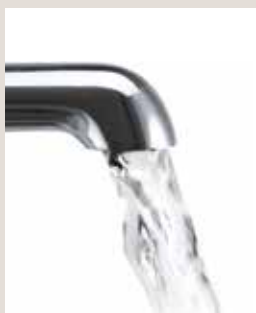

The underside of a bath spout of a normal, traditional bath tap.

*Burlington spout*

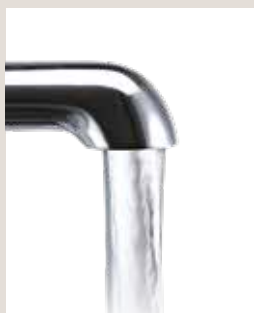

The underside of a Burlington bath tap with a Neoperl aerator.

### *Normal tap*

Water flow in a normal traditional tap.

### *Low pressure*

Low pressure water flow with a Burlington tap using a flow straightener.

### *High pressure*

High pressure water flow with a Burlington tap using an aerator.

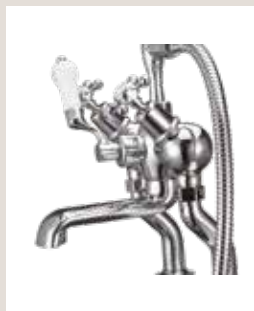

Our taps are designed to deliver the following maximum flows of water, regardless of the incoming water pressure:

Basin taps: 13L per minute.  
Bath tap: 14L per minute.  
Bath shower mixer: 22L per minute.

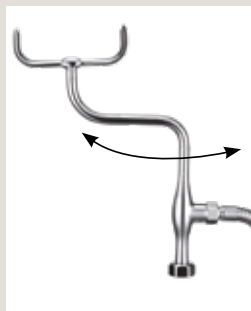

### *Swivelling spouts*

All our bath fillers and bath shower mixer spouts swivel - so you don't have the spout in your way when you shower.

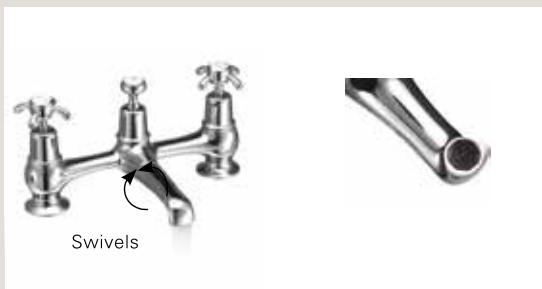

### *Angled mixers*

All our bath fillers and bath shower mixers are available in an 'angled' version.

### *S adjuster*

The S adjuster allows the telephone handset to be positioned over the bath. The bath shower mixer can be installed with or without the 'S adjuster'.

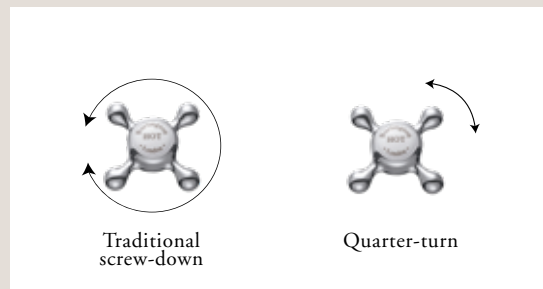

Swivels

### *Bridge mixers*

Our bridge basin mixer has a swivelling spout and allows you to have mixed hot & cold water, whilst using a two taphole configuration.

- Straight down
- 90° left or right
- Straight up
- Normal basin mixer
- Off

Traditional screw-down

Quarter-turn

### *Quarter-turn options*

All Burlington taps are available with traditional screwdow valves or with quarter-turn valves. The taps work with both low and high pressure. To order your tap with quarter-turn valves add QT to the end of your brassware code.

*BASIN TAPS*

*Regent Options*

Our regent base which can be used on all one, two and three tap hole taps (excluding Stafford) offers an extra height of 30mm than the standard tap base and adds a further 30mm distance away from the wall when wall-mounted.
